Summary

Senior Software Developer with **2.5+ years of experience** designing and building scalable **backend architectures** and **REST APIs** using **Django** and **FastAPI**. Strong background in **distributed systems**, **microservices**, **event-driven architectures**, and cloud platforms **GCP**, with hands-on experience in **Kafka**, **Redis**, **Celery**, and **gRPC**. Passionate about building **high-availability**, **data-driven** applications.

Experience

Adani Green Energy Ltd (Off-roll) Ahmedabad

Sr Software Developer Aug 2025

- Designed and developed scalable backend services using **Django** for a renewable energy **power forecasting platform**.
- Collaborated with **business stakeholders** and an **external development team** to gather requirements, provide technical guidance, and ensure successful feature delivery.
- Built interactive dashboards to compare forecasts from **actuals** and multiple prediction models, enabling better operational analysis.
- Integrated **satellite imagery** and **real-time/historical weather data (WMS)** to improve forecasting accuracy.
- Developed a **Deviation Settlement Mechanism (DSM)** penalty calculation dashboard for business stakeholders.
- Automated nearly **60% of manual workflows** by developing Python-based automation scripts for data processing, report generation, and operational tasks, significantly improving efficiency.
- Designed and maintained **high-availability backend services**, leveraging **Redis** for caching, **Celery** for asynchronous task processing, and **GitLab CI/CD** for automated build and deployment pipelines.

Technologies: Python, Django, Pandas, Redis, Celery, PostgreSQL, MySql, GCP (Compute Engine, Cloud Storage), GitLab CI/CD, Git, High-Availability Systems

Urbano Infotech Ahmedabad

SDE II Sep 2023 - Aug 2025

- **Developed** and maintained scalable backend services using **Django Rest Framework (DRF)**, ensuring robust API performance and seamless integration.
- Built an intelligent **chatbot solution with RASA framework**. enhancing customer interaction through automated responses.
- **Designed and implemented** RESTful APIs with **FastAPI**, optimizing response times and resource efficiency.
- **Managed** data storage and retrieval with **PostgreSQL**, **Dynamodb** and **MongoDB**, ensuring data integrity and efficient querying.

Technologies: Python, Django, DRF, FastAPI, RASA, PostgreSQL, MongoDB, Next.js, React, Js

Skills

Languages: Python, GoLang, SQL , CPP

Backend: FastAPI, Django, DRF, REST APIs, gRPC

Databases: SQL (Postgres, MySQL) | NoSQL (MongoDB, DynamoDB)

Frontend: Next.js, HTML5/CSS3, Bootstrap, Tailwind CSS

OS: Windows, MacOS, Ubuntu , Linux

Architecture: Monolithic + Microservices, Kafka, Event-Driven Systems

Cloud & DevOps: AWS, GCP, Docker, Git, GitHub, GitLab, Bitbucket, Jira

Projects

Book you pandit

- Built a platform connecting users with pandits for various religious ceremonies.
- Developed backend services for **pandit management, pooja services, and user management**.
- Implemented an **API Gateway using FastAPI** to route, secure, and manage client requests across backend services.
- **Improved API response times by ~30%** through optimized request handling, query tuning.
- Integrated a **payment gateway** and optimized **background processing using Celery**.
- Developed **Frontend using Next.js**, improving accessibility across web and mobile devices.

Crypto Trading Platform (Microservices Architecture)

- Designed a **microservices-based crypto trading platform** using **FastAPI**, following clean service boundaries.
- Implemented core services including **Auth, User, and Wallet**.
- Used **gRPC** for internal service-to-service communication and **Kafka** for event-driven workflows.
- Implemented **secure authentication using JWT with JWKS**.
- Added **rate-limiting and request validation** to ensure API security and stability.
- Utilized **Redis** for **caching and low-latency data access**, improving system performance and reducing database load.

Achievement

- Secured 1st rank in problem solving on GeeksforGeeks among students in my college. 1.5 Year
- Achieved 5★ in Python and C++ and 4★ in C on HackerRank.

Education

IES Institute Of Technology and Management	B.Tech
Computer Science and Engineering (8.6 CGPA)	2019 - 2023

Certifications

Prompt engineering	2025
Problem Solving (Intermediate) - HackerRank	2024
AWS - Great Learning Academy	2024
Python Pandas - Great Learning	2024
REST API - HackerRank	2024
